

**Town of Grand Rapids**  
**2410 48<sup>th</sup> St. S.**  
**Wisconsin Rapids, WI 54494**  
**(715) 424-1821**

For obtaining a permit for an **ATTACHED RESIDENTIAL GARAGE** the following must be done before the Building Inspector can issue the permit:

1. County Zoning Permit – If your building project is located within 1,000 feet of a lake or flowage, or within 300 feet of any navigable stream, then you would be required to apply for a zoning permit from Wood County Planning and Zoning. (715) 421-8466
2. Town of Grand Rapids Zoning Permit – Zoning permits are issued concurrently with the building permit. You will need to provide zoning information as part of this application.
3. Plot Plan – You will need to submit a plot plan showing the location of the building in relation to other buildings, wells, surface waters, property lines, and septic systems.
4. Building Plans – showing the size of the structure, an elevation of the structure, and a cross sectional drawing showing the types of materials being used. Floor Plan showing doors/windows, etc.
5. Building Permit Application – The permit applications included here are interactive and can be filled out here and printed for submittal, or can be printed and filled out manually.
6. Electrical Permit – will be required if the garage is to have wiring installed within or onto the structure.
7. Signed “Cautionary Statement” – if the owner is taking out the building permit. Other than the property owner, only a State certified contractor may take out local building permits for work performed on one and two family dwellings.

## INFORMATION

Zoning ordinances are on-line at the Town's website listed below (Chapter 52 is the zoning ordinance).

The construction must meet the Uniform Dwelling Code (UDC) for Wisconsin

Some of the zoning regulations and building codes are attached at the end of this file.

Driveway Permit – All driveways installed, altered, changed, replaced, or extended must have a driveway permit and be approved as to location by the Town Public Works Committee Chairman.

All this information and forms are available at the Town of Grand Rapids Website at [www.townofgrandrapids.org](http://www.townofgrandrapids.org) along with applications for other types of permits also.

## GARAGES: ATTACHED

**Attached garage** is a structure that is attached directly to the home.

**Setbacks** from closest point of any **wall** to:

Street lotline – 30' or 63' from C/L of town road (greatest)      Septic tank – 5'  
Rear and side lotline – 9'                      Drainfield and Alternate drainfield – 10'

**Fire separation** to be ¾-hour firewall from top of the foundation to the underside of the roof sheathing. (Drywall need not be taped if edges are tightly fitted, but must be backed by solid wood (framing member) or another layer of drywall:

5/8" fire code drywall on the garage side, or  
½" drywall on both sides of the wall between garage and house, or  
Two layers of ½" on the garage side.

Construction requirements as specified in the Wisc. Uniform Dwelling Code.

Roof design **minimum** is 40# snow load.

Headers over 9' long in bearing walls must meet structural requirements and have double shoulder stud under each side of opening if the header is over 6' long.

Walls must be bolted or otherwise secured to foundation.

A minimum of 6" is required from earth (finished grade) to untreated siding.

Floors shall be concrete not less than 4" thick.

Reinforced concrete floor not less than 4" thick;

- The concrete must be sloped to aid in draining to an overhead door or to exterior grade such that no damage will be caused to any structural member or wall covering of the garage; A floor drain per Comm 82 is an option instead of sloping as described.
- Footings and foundation are to be the same type as the house – minimum 48" from the bottom of footing to finished grade, or must meet Comm 21.15(1)(e)
- Foundation must be continuous
- Vapor retarder material shall be at least 6 mils thick and installed under floor (required only in heated garages)
- Bolts, 1/2" diameter, with nuts and washers, shall be embedded at least 7" in the concrete, no more than 6' apart and located within 18 inches of wall corners.

**Wiring** is required and must include:

1. One switched light inside garage;
2. A switched light at all service doors (not overhead doors)
3. At least one GFCI- protected outlet (all 15 and 20 amp receptacles need to be GFCI- protected)

**Exhaust ducts** from ranges or bathrooms may **not** terminate in the garage, and must be vented to the outside.

**Combustion air** for fireplaces and heating appliances may **not** be taken from the garage.

**Heating:**

- **Unvented furnaces** and space heaters are prohibited.
- **Heating units**, including *woodburners*, may **not** be installed in a garage unless specifically designed and listed for garage installation.
- **All** units shall have burners and burner ignition devices at least 18” above floor and be protected or located so the furnace is not subject to physical damage from a moving vehicle.

**Building Permit is required.**

When applying for permit, please provide detailed plot plan, including distances to lotlines, other structures, septic tank, drainfield area, and cross-section of components. Permit expires and garage to be completed within two years.

**Permit fees:**

Construction \$75      Electrical \$40  
HVAC                    \$40  
Driveway (In ROW) \$50
