

## Public Information Meeting

Sep 08, 2011

The University of Wisconsin - Stevens Point, in conjunction with several other local, state and regional organizations, will be conducting air quality monitoring in the Town of Grand Rapids beginning in late September or early October, 2011 until February, 2012 as part of the 2011 Midwest Woodsmoke Study. The purpose of this non-regulatory activity is to provide the town board and citizens of Grand Rapids with information on air quality in the community and the impact of woodsmoke on local air quality levels. On September 8th at 6:30 p.m. at the Grand Rapids Fire Station, a short overview presentation of the upcoming study will be presented and there will be an opportunity for citizens to ask questions.
